

ROBINS, KAPLAN, MILLER & CIRESI L.L.P.

Robins, Kaplan, Miller & Ciresi L.L.P.'s business attorneys focus on representing technology driven enterprises ranging from start-ups to publicly-traded corporations in the areas of mergers and acquisitions, corporate finance and securities, strategic intellectual property monetization and technology transactions. We offer pragmatic and focused advice from experienced senior advisors. Our creative approach and lean staffing can help you achieve your desired results as efficiently as possible.

Mergers and Acquisitions. We handle public and private negotiated acquisitions and dispositions and advise Boards and special committees in responding to friendly and hostile overtures.

Corporate Finance and Securities. We represent companies in all aspects of capital formation, including angel and seed financings, private placements, initial and secondary public equity offerings, mezzanine financings, and public and private offerings of debt, as well as with respect to general securities compliance.

Strategic IP Monetization and Technology Transactions.

We represent clients in acquisitions, dispositions and licensing of intellectual property. Utilizing Ph.D. scientists, financial advisers and attorneys with deep IP and technology experience, we can help you recognize real, quantifiable value if you buy, sell, invest in or operate IP-driven businesses.

Accelerant. In an effort to better support innovators and entrepreneurs, we have developed a suite of online legal resources designed especially for the sophisticated pre-money start-up. This program, which includes a variety of targeted legal resources, is called Accelerant. Accelerant is not for everyone, and we are generally limiting participation to highly-skilled entrepreneurs with high-growth business models.

Please contact any of the attorneys profiled below for more information.
