The Integra Group is a contract medical research organization that serves a wide variety of research and development projects with over 150 clients and over 300 unique device, pharmaceutical, and biologic therapies under development. Our core competencies are:

- » Biostatistics
- » Large, Adaptable Preclinical Research Facility
- » Clinical Trial Management
- » Physician and Sales Force Training
- » Clinical Data Management
- » Monitoring
- » Field Clinical Engineers
- » Regulatory Support
- » Anatomic Studies

Integra's expert consultants have continuous interactions with FDA and are well positioned to advise its clients on the current regulatory environment, research challenges, and best pathway to market approval. With a proven track record of success, our implementation capabilities has executed complex study designs for preclinical, clinical, or postmarket research studies with efficiency and precision.
